

## How to Calculate the Number and Category of People Allowed at the Venue

This document addresses how to calculate the number of people per 2 main categories that can be at a venue based on the current Phase restrictions in the ReOpen Saskatchewan Plan and the BSI Return to Sport Plan. The 2 categories we consider are **participants** (athletes, coaches, and support staff who could be physically on the court during training/competitions) and **spectators** who would be courtside.

ReOpen Plan Phase	ReOpen Plan Indoor/Outdoor Gathering Size Restrictions	Return to Sport Phase	Participants on a Court Full Size/Reduced Size
1	10/10		
2	10/10		
3	3.1 15/30 3.2 15/30		
4	4.1 30/30 4.2 TBD	1 2 3 4	15 participants/8 participants 16 participants/8 participants 16 participants/16 participants TBD/TBD
5	TBD	5	TBD

Use the above summary chart to answer the following questions

A Is the Venue Indoors or Outdoors	
B - What is the Current ReOpen Saskatchewan Plan Guidelines for Gathering Sizes for the Type of Venue	
C - What is the Current Phase Guidelines Return to Sport Plan Group Size	
D - What is the Size of the Court	
E - How Many Participants Can Be on the Court Based on the Court Size in the Current Phase	
F - How Many Participants (players, coaches, facility staff) Do You Have Note: must be equal to or less than the answer to section B	
The Answer for B minus the Answer for F will let you know how many spectators can be allowed around the court area. Note: spectators must be able to maintain appropriate physical distance from each other AND the participants	

If you operate a program where the spectator is a parent/guardian who is REQUIRED to be courtside (i.e. in attendance because of age of player, safety plan of organizations, medical concerns etc) then that spectator number should be included in the participant number. If the participant number exceeds the ReOpen Plan or facility guidelines on gathering sizes then the program must be adapted so fewer people are at the venue.
